FEBRUARY 2018

NEW! ENGAGING THE COMMUNITY- A SNAPSHOT.

One of the key outcomes of the review of DFES Community Engagement Framework in 2017 was that DFES emergency service personnel wanted something easier to understand, making interactions meaningful and creating community action.

DFES personnel and our network of volunteers on the ground in each region are best placed to understand the local communities in which they work, identify hazards and risks applicable to the local area, and to establish strong relationship based on mutual trust and respect.

As a result, DFES is proud to release the new tool 'Engaging the Community – a Snapshot' and the newly revised Community Engagement Framework to support you in working with your communities. Both of these publications are available at:
