**COMPUTER AIDED DISPATCH (CAD) REPLACEMENT PROJECT**

---

The CAD Replacement Project is scheduled to deliver a new Computer Aided Dispatch (CAD) system for DFES that will replace the FCAD which is currently used by ComCen. On the 7<sup>th</sup> of July 2017 a contract was signed with Motorola to deliver the PremierOne CAD (P1 CAD) system for DFES. This is the same CAD system used by WA Police (WAPOL), but it will be developed specifically for DFES' requirements and operate independently of the WAPOL CAD.

DFES are collaborating with WAPOL on this project to enable sharing of infrastructure and services. To deliver the project, DFES has secured many of the team that successfully delivered the WAPOL CAD project who bring a wealth of experience and knowledge to this project.

The CAD Replacement Project is also aligned to the replacement of the existing Mobile Data Terminals (MDT), which will deliver a more effective device that can operate with the new P1 CAD.

The CAD Replacement Project has a significant business change component and this team will work closely with DFES staff and volunteers to deliver fit for purpose CAD and MDT solutions to support frontline operations.

The project aims to deliver the P1 CAD system before the 2018/19 bushfire season with the MDT replacement being delivered shortly after. For regular updates an intranet site is being developed and more details on this site will be released in the near future.

The project office is located at 363 Oxford Street, Mount Hawthorn and for more information please contact **District Officer Adam Bannister** by email or telephone **(08) 9413 3716**; or the project on [CAD.ReplacementProject@dfes.wa.gov.au](mailto:CAD.ReplacementProject@dfes.wa.gov.au).
