AVL Transition Project

Telstra have indicated that they will be decommissioning the current 3G mobile network, which will have an impact on a number of AVL units throughout the state.

DFES Plant and Equipment branch will be undertaking a project to transition existing 3G AVL units to 4G compatible units across the state.

During the AVL transition process DFES will be engaging technicians to undertake hardware changes throughout the state with the intention to minimize the impact on operational requirements.

DFES Plant and Equipment branch will contact affected regions directly in support of this project.

For more information, please contact Felix McQuistan, District Officer, Fleet Programs Coordinator on 0427 282 334 or Email; felix.mcquistan@dfes.wa.gov.au
