

OPERATIONAL CIRCULAR 05/2020

File: D12687

January 2020

VHF HIGH BAND REPEATER CHANNEL 150 – BINDOON DEFENCE

Due to the location of current repeaters, command communications within the region of the Bindoon Defence Training Area has relied upon multiple communication plans to allow for full coverage.

To support a single point of effective communications it was determined that a VHF high band command channel was required at this location. This provides access to one communication plan to cover operations throughout the training area. Repeater 150, supported by Goldfields/Midlands communications plan 'Bindoon Defence', is now operational and available for all hazard's response.

The Goldfields / Midlands Region - Plans and Resources folder has been updated to reflect this change and is available on the Operational Communications Doctrine page.

Key Message

VHF high band channel 150 is now operational and is to be utilized with Midlands Goldfields communications plan 'Bindoon Defence'.

For further information, please contact District Officer Operational Communications on 9395 9676.
